

Welcome to our practice

Our aim is good dental health, helping you and your family to maintain a healthy lifestyle. Regular dental care and understanding how to care for your teeth will ultimately reduce your need for dental treatment.

This leaflet is designed to answer some basic questions but, if you require any additional information, please do not hesitate to ask. We shall be pleased to discuss your individual needs and welcome your comments or questions on any aspect of our practice. Our aim is to help and maintain your dental health and provide gentle comfortable care.

The Dental Surgeons

Dr Christopher Holden BDS U Sheff LDS RCS Eng DGD (UK)

Christopher Holden qualified from Sheffield University in 1981. He has worked both in the hospital services and general dental practice. With a special interest in pain and anxiety control he regularly lectures and teaches on postgraduate courses to doctors and dentists in the field of Intravenous Sedation and Life Support. He has taught widely both in the UK and at major meetings worldwide. Christopher has produced two films on the safe practice of Intravenous Sedation. He has a strong commitment to postgraduate education for the benefit of patients, having served on professional committees nationally within the Royal College of Surgeons of England, as well as locally. He has given expert evidence in the civil and criminal courts in the UK, Europe and Australasia. Christopher is trained in both the surgical and restorative aspects of the Nobelbiocare range of dental implants.

Dr Anita Patel BDS U Sheff

Anita Patel qualified from Sheffield University in 1995 and joined the practice in 1996. She was chosen to work within the practice particularly for her special interest in the care of the anxious and frightened patients. All her patients can confidently benefit from the comfortable range of sedation techniques with which they are familiar and for which the practice has a reputation.

Our choice of services

Private treatment is routinely available and we will be pleased to explain your options and the relative costs.

We are a Denplan registered practice. This is an alternative and cost effective method of obtaining quality dental care. As well as budgeting for quality time, this scheme has the advantage of accidental insurance and cover whilst abroad.

If you wish to join Denplan please make this clear to the receptionist and dental surgeon and we will provide an assessment for you and guide you through the denplan registration procedure.

Our range of services

Please tell us if you have any special needs. We have facilities to assist people in wheelchairs and for those who cannot cope with stairs. Please discuss any individual requirements with the dental surgeon so that facilities can be arranged to provide your treatment in maximum comfort
